

Bitdefender® PREMIUM VPN

TOTAL PROTECTION OF YOUR PRIVACY

- ✓ UNLIMITED and encrypted traffic for up to 10 devices
- ✓ Unblocks your favourite streaming sites
- ✓ Ultra-fast servers (over 4,000 servers in over 50 countries)
- ✓ No traffic recording or activity logs
- ✓ Removes unwanted ads while browsing
- ✓ Hides your location and deactivates trackers

COMPATIBLE WITH:    iOS

Bitdefender Premium VPN is a service that grants you complete online anonymity by encrypting all traffic on your PC, Mac or mobile devices.

Stay anonymous on the Internet

Going incognito is not enough to stay anonymous. With Bitdefender Premium VPN, your real IP disappears completely, and it is impossible to link you with your online activities. We are proud to protect your right to privacy, and we keep no records of your browsing activity.

Secure your connection on public networks

Public wi-fi, for example in airports, bars, restaurants and shopping malls, are favourite targets for cybercriminals. You can activate your VPN with a simple click and secure your web browsing with military-level encryption, making intrusive access impossible.

Access content all over the world

Governments, universities and even some ISPs conduct a form of online censorship by blocking access to certain websites or applications. You can break free of regional restrictions and explore all the Internet with Bitdefender Premium VPN.

Unblock streaming services

With Bitdefender Premium VPN, you can enhance your experience and overcome limitations or restrictions in bandwidth. Watch your favourite videos or films in ideal conditions, without being accountable to anyone.

Buy it online at the best price

Many travel and airline websites use a dynamic system to adapt their prices, which could potentially penalize you. With Bitdefender Premium VPN you can connect via different countries and get the best deal.

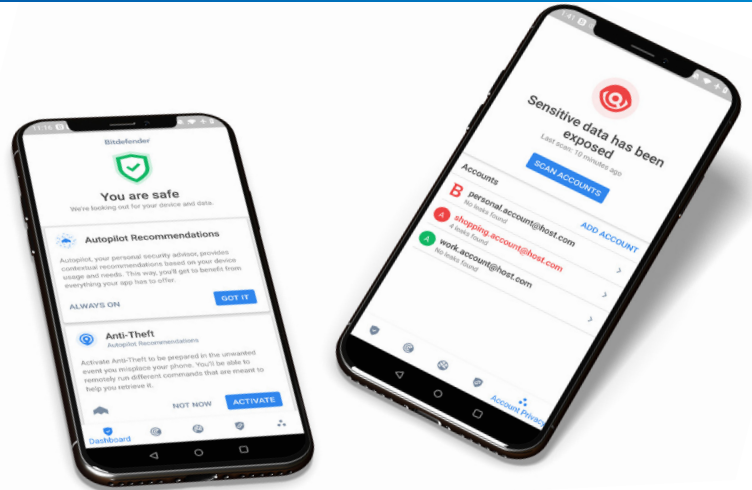

Protect yourself from attacks and piracy

Bitdefender Premium VPN protects you from piracy. It can prove useful when you are gaming online and your opponent tries to take advantage of you by using unorthodox methods, such as DoS attacks to slow you down.

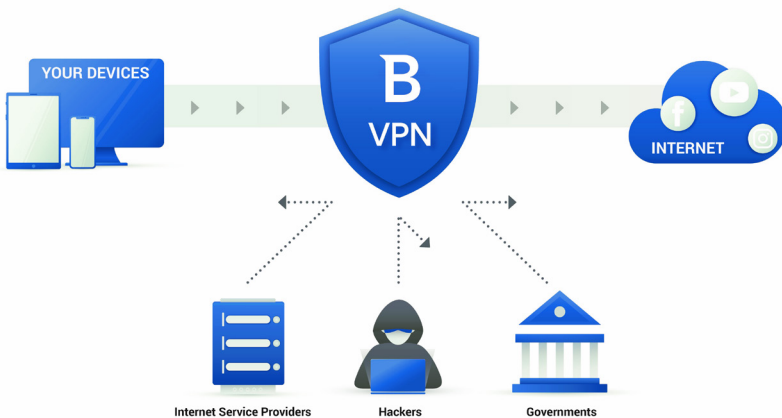

Why use a VPN?

When you use the internet, everything you do can be monitored. Corporations, government agencies and hackers can keep track of your IP address and see which sites you visit. ISPs can also sell your browsing history to third parties.

A VPN is like a secure and encrypted tunnel, masking your IP address and preventing hacking, monitoring or spying. If your data are intercepted, they will still be unreadable, except for their end user.

With Bitdefender Premium VPN, what you do on the Internet is purely your own business.

Why choose Bitdefender Premium VPN?

-  Developed by an award-winning leader in security solutions, giving priority to your confidentiality.
-  Fast, secure connection to over 1,300 servers located in over 30 countries.
-  Unlocks media, videos and messages from all over the world.
